	Total Dist. and Whse. Costs	15,499	6.22	27,899	13.16	10,712	6.74	27,707	17.43

Note 1: These figures include the Pairs to be Shipped figures entered at the top of the page and their associated model availability and S/Q rating attributes. If all of the available pairs at a facility are not shipped then the unshipped pairs will be automatically shipped to regional warehouses in proportion to the shipping decision entries that exist for that facility.

Note 2: The number of models and S/Q rating of pairs available in each warehouse is a weighted average of the models and S/Q ratings of pairs in beginning inventory and of pairs shipped in from each plant. The weighted average model availability and weighted average S/Q rating in each region is used to determine the attractiveness of your brand against the brands of rival companies in the industry.
